# Cannabis Market

---

The first Data entry in history

The first documented case of cannabis use dates back to 2800 BC, when it was listed in the Emperor Shen Nung's (regarded as the father of Chinese medicine) pharmacopoeia.

# Cannabis American History

. The history of cannabis cultivation in America dates back to the early colonists, who grew hemp for textiles and rope. Political and racial factors in the 20th century led to the criminalization of marijuana in the United States, though its legal status is changing in many places now.

# The plant

Cannabis as .  
Three species sativa, indica, and ruderalis.

The flower, or bud, is the smokable,  
trichome-covered part of a female plant.

Flower is the most popular form of cannabis  
since it can be consumed in a variety of ways,  
smoked in a joint, vaporized in a vaporizer, or  
incorporated into edibles.

THC is the substance that's primarily responsible  
for the effects of marijuana on a person's mental  
state.

# The law

A century after becoming the first U.S. state to criminalize recreational cannabis in 1911, Massachusetts voters elected to legalize it in 2016.

## Legality

Recreational marijuana is regulated and taxed but legal in Massachusetts, with retail sales from licensed dealers becoming legal on November 2018.

# Data resources

So I gather Data from cannabis control commission of massachusetts why them ?

Because the only available source information is the gouvernement, I have never see in my entire life an Illegal business, with receipt and declaring taxes to the government knowing that.

This is real Data about our actual Weed market in USA,

# Hypothesis

Is it still worth it to open  
a Marijuana business in  
2023 ?
